Outpatient Registration (North Tower) Hospital hours
6:30am-7:00pm

You are to have nothing to eat or drink after midnight the night before your procedure.

Take your regular scheduled medications the morning of the procedure.

If you take Plavix and/or Aspirin you must continue taking them. IF YOU ARE NOT ALREADY TAKING ASPIRIN BE SURE TO notify the office immediately.

Take a list of your medications to the hospital with you.

If you are diabetic and you take Glucophage (Metformin) or any combination diabetic drug that has this medication in it you must hold it for 24 hours before and 48 hours after the procedure. If you use Insulin you must half your dose the morning of the procedure. Any other Diabetic meds must be held the day of the procedure.

If you take Coumadin (Warfarin) you must come off of it before the procedure. Please notify us if you do take this medication. Your physician will let you know when to hold your medication as each patient is different. You must stop Coumadin days prior to the procedure.

Please notify us if you have had a coronary artery bypass graft in the past as this information is necessary for the physician to have to perform your procedure.

Someone will need to be available to drive you home after the procedure they will not let you drive by yourself. It is recommended that you do not drive for 48 hours after the procedure as well. No strenuous activity is recommended for 48 hours after the procedure.

Make sure you have a follow-up appointment with your physician to go over your results. If you can not make this appointment time or date please call the office in which you are seen most often as soon as possible.
